DETAILED ACTION***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Inbasekaran et al., U.S. Patent Number 6,353,083.

Inbasekaran discloses polymers that are formed by fluorene monomers with the repeat units of

wherein in R_1 and R_2 can be hydrogen and R_5 and R_6 can individually be hydrogen or a C_{1-6} aryl group such a phenyl (or can be a fluorene structure) (see column 2, line 17-50). Additionally, the reference discloses that there is second repeat unit. Column 2 discloses a second repeat with the

structure

. Column 4, lines 20-68 of the reference discloses that the repeating units can comprise electro-withdrawing groups such as fluorine, cyano, and condensed polycyclic aromatics such as pyridines and triazines. It is disclosed in column 3, lines 37-50 of

the reference that the polymer can be used in electronic devices including light emitting diode. Inbasekaran discloses that the copolymers can be prepared by a variety of polycondensation processes involving the monomers catalyzed by transition metals such as nickel and palladium. Also, the reference discloses that in the procedures that monomers bear halogen substituents (preferably bromine and chlorine) for reactivity (see column 8, lines 32-65).
